15. (Currently amended) A method for manufacturing a hair removal system, comprising:

providing a first pad ~~within which to impregnate hair removal solution;~~

impregnating the first pad with hair removal solution,
wherein the hair removal solution includes ingredients of
calcium hydroxide and thioglycolic acid;

placing the first pad in a first pouch formed between first and second pieces of material; and

sealing the first pouch.

16. (Cancelled)

17. (Cancelled)

18. (Cancelled)

19. (Currently amended) The method of claim 15 further including joining a third piece of material together with the first piece of material opposite the first piece of material to form a second pouch opposite the first inner pouch.

20. (Original) The method of claim 19, further including enclosing a portion of the hair removal solution in the second pouch.

21. (Original) The method of claim 20, further including enclosing a second pad in the second pouch.

22. (Cancelled)

23. (Cancelled)

24. (Cancelled)

25. (Cancelled)

26. (Cancelled)

27. (New) A hair removal product, comprising:
a package;
a first pouch within the package;
a second pouch within the package, the second pouch being
physically separate from the first pouch;
an applicator pad enclosed in the first pouch; and
a hair removal solution enclosed in the second pouch.

28. (New) The hair removal product of claim 27, wherein the
hair removal solution includes ingredients of calcium hydroxide
and thioglycolic acid.

29. (New) The hair removal product of claim 27, wherein the
applicator pad is impregnated with the hair removal solution.

30. (New) The hair removal product of claim 27, wherein the
applicator pad is impregnated with a cleaning solution.

31. (New) The hair removal system of claim 9, wherein the hair
removal solution includes ingredients of about 3% weight per
